

The Transport Capital Works Program for 2017/18 - 2023/24 is provided on the basis that funding will be approved to the totals as shown for the various programs, therefore the works listed are subject to change as budgets are adopted over the proceeding financial years.

The following should be noted when viewing the attached table:

- Every attempt has been made to ensure accuracy of the projects listed, however, as there may be changes to budgets and as the program may be altered to accommodate urgent or unforeseen works - the program is published as a working document that will be constantly monitored and revised as required,
- Strategic estimated costs are provided as a guide only and are subject to change. Variations to these estimated costs may be necessary due to change in scope as investigations are carried out as part of the design process, material costs, site conditions and geotechnical investigation,
- The timing of the projects may vary depending on the design requirements, external approvals, available resources, weather etc,
- The program may be changed as final adopted budget figures are determined each year, and
- All reasonable efforts have been made to ensure that there are no duplications of road segments across the various program areas and any remaining duplications will be addressed at the time of investigation works to ensure the appropriate treatment is applied.
