

Have you been affected by bushfire?

Need some support to get back on track?

It is normal to have strong emotional and/or physical reactions following a distressing event. This includes natural disasters such as bushfires. You can experience these reactions whether you are directly or indirectly affected.

Almost everyone who experiences a distressing event will be emotionally impacted. But **not everyone** will respond in the same way.

Possible reactions to distressing events include:

- Feeling stressed, anxious, exhausted or confused
- Feeling sad, overwhelmed or angry
- Shock, feeling 'numb'
- Uncertainty about the future
- Feeling lonely, isolated or withdrawn
- Feeling unwell – headaches, difficulty sleeping, eating, weight loss/gain
- Resentment or blaming others
- Increased substance use
- Thoughts of suicide or self-harm
- Nightmares or vivid dreams

For many people, these reactions will lessen over a few days or weeks, however for some people it may take longer. **Help is available if you need it.**

When to seek help

If your distress lasts longer than one month, or you are concerned - it is a good idea to seek the support of a health professional.

Talking to your GP about how you are feeling is a good place to start

Mental Health - Bushfire Support

For young people and children

What help is available?

Your GP can help you with different support options. This could include accessing local mental health services.

FREE Mental Health Services

If you live in Wollondilly, Wingecarribee or Camden and feel you have been affected by the bushfire crisis, you and your family can access free mental health support.

Support for Children (aged 3-12)

STAR4Kids provides free mental health support for children affected by bushfire who live in Wollondilly, Wingecarribee & Camden.

How to access STAR4Kids

Talk to your GP to find out more.
