

RRT Assets

The Rapid Relief Team (RRT) owns a suite of assets which are located in strategic locations across Australia. RRT's team of volunteers are mobilised and ready to deploy the assets below at a moment's notice when disaster strikes.

RRT Semi Trailer

Introduced in 2020, the RRT Semi Trailer is used for large events and is equipped with everything volunteers need from all terrain forklifts right through to the RRT marquees. The RRT Semi Trailer allows RRT to support events across the country with ease.

RRT Event Assets

RRT has an array of event assets stationed in regions across Australia.

BBQ Trailers

Custom designed state of the art trailer enabling fast deployment in emergency catering situations. The trailer is equipped with non-perishable items required for catering events and essential signage.

Coffee Pods

The portable RRT Coffee Pod is one of the latest additions to RRT's asset register, and helps pump out barista made coffee to event attendees.

Coffee Trailers

RRT's Coffee Trailer has been designed specifically for RRT, and has the capacity to make 400 barista coffees per hour!

Marquees

It isn't an RRT event without RRT's famous red tents!

rrt RAPID RELIEF TEAM

COMMUNITY | COMPASSION | SUPPORT

All Terrain Forklifts

RRT's All Terrain Forklifts assist in the set up and pack down of large RRT events, and are particularly helpful in the Farmers Community Connect events for moving tonnes of livestock pellets and bales of hay.

Cool Room Trailer

RRT's Cool Room Trailer is an efficient solution to keeping food items and refreshments at a desirable temperature.

Rapid Water Systems Assets

RRT's Rapid Water Systems (RWS) is designed and engineered to rapidly pump water from a previously inaccessible water source to a central staging site near the fire front, enabling firefighters and aerial firefighters to spend more time on the frontline.

Frac Tanks

The RWS Frac Tanks has the capacity to hold 70,000 litres of water, and can fill four CAT 1 Tankers in less than four minutes.

Flexitanks

The RWS Flexitanks are ideal for filling helicopter tanks, and with a 12,000 litre capacity, each Flexitank can fill four helicopters.

RRT Flood Support Assets

Rapid Sand Bagger

RRT's Rapid Sand Bagger can fill over 1,500 sand bags per hour, and is portable so can be deployed right across Australia.

Hand Sanitiser Station

Good hygiene is a priority for RRT, and the portable hand sanitiser stations make it easy for volunteers and event attendees to stop the spread of germs at events.

Bulk Water Tankers

The RWS Bulk Water Tankers offer a portable option for bulk water, and each tank can hold 24,000 litres.

Skidsteer

The Skidsteer machine is used to lift and load sand into the sand bagging machine, and transport pallets of sand bags.
