5. Requirements for Expert

The expert appointed to determine a Dispute:

11. Other Courses of Action

If the mediation referred to in clause 2 of this Schedule 3, or the expert determination required or agreed under clause 3 of this Schedule 3, has not resulted in resolution of the Dispute, any Party may take whatever course of action is deemed appropriate for the purpose of resolving the dispute.

Description of Proposed Development

Modification of consents for the purpose of amending stormwater treatment for:

- A Staged Residential Subdivision Creating 43 Lots, Tree Removal, Demolition of Existing Structures & Construction of Roads; and
- A Staged Residential Subdivision Creating 82 Lots

Objectives, nature and effect of the proposed voluntary planning agreement

(Environmental Planning and Assessment Regulation 2000, cl 25E(1)(a))

This Explanatory Note relates to a proposed Voluntary Planning Agreement between the Developer and Council to provide storm water infrastructure for the land and to provide a monetary contribution towards maintenance of that infrastructure into the medium term. The storm water infrastructure is necessary due to the fact that the Council has approved the residential subdivision of the land by the developer for a total of 125 lots.

How the agreement promotes the public interest and one or more of the objects of the Act

(Environmental Planning and Assessment Regulation 2000, cl 25E(2)(a))

The Draft Planning Agreement promotes the public interest by promoting the objects of the Act, as set out in s.1.3(a)-(c), (g)-(h) and (j).

The proposed storm water infrastructure will assist with a better environment by properly managing storm water flows on the land.

In particular, the agreement promotes the orderly and economic use and development of land by providing for storm water infrastructure and contributions to the medium term maintenance of that infrastructure. The infrastructure will provide enhanced support to a residential subdivision that is already the subject of development consent and provides long term infrastructure to support the future community on the land the subject of this agreement.

Further, the public exhibition of this Draft agreement will provide the community an opportunity to participate in planning outcomes for the land.

How the agreement promotes elements of the council's charter under section 8 of the Local Government Act 1993

(Environmental Planning and Assessment Regulation 2000, cl 25E(2)(d))

The Council's Charter has been replaced by Principles for Local Government. The Draft Planning Agreement meets these Principles by:

Guiding principles (s.8A)

- Providing best possible value for residents and rate payers in the provision of stormwater infrastructure;
- Providing effective and efficient services to meet the needs of the local community;
- Meeting future local community needs in an affordable way;
- Working with others to secure appropriate services for local community needs;
- Active engagement with the local community

Sound financial management (s.8B)

- Investment in responsible and sustainable infrastructure;
- Supporting asset maintenance

Identifying a planning purpose or purposes served by the agreement and an assessment of whether the agreement provides for a reasonable means of achieving that purpose

(Environmental Planning and Assessment Regulation 2000, cl 25E(2)(e))

The Draft Planning Agreement provides storm water infrastructure relating to the land and assists with the funding of recurrent expenditure for maintenance of that infrastructure (s.7.4(2)(c), (d)). Storm

water infrastructure will be needed for the land due to the residential subdivision for which consent has already been obtained. The Draft Planning Agreement therefore contributes to the orderly development of the land, as described above.

The Draft Planning Agreement provides for the developer to prepare those works and provide them to the Council free of defects and also to provide a contribution towards funding of maintenance of the works, which will be necessary for the local community. It is therefore considered a reasonable means of achieving the planning purpose.

Does the agreement conform with the planning authority's capital works program (if any)?

(Environmental Planning and Assessment Regulation 2000, cl 25E(2)(f))

The Draft Planning Agreement will support Wollondilly Shire Council's Capital Works Program. The Draft Planning Agreement is consistent with and supports Council's Operational Plan.

Does the agreement specify that certain requirements of the agreement must be complied with before a construction certificate, occupation certificate or subdivision certificate is issued?

(Environmental Planning and Assessment Regulation 2000, cl 25E(2)(g))

The Draft Planning Agreement specifies that works are to be completed and the monetary contribution paid before the issuing of subdivision certificates.

Merits of the Agreement and Impact on the public

(Environmental Planning and Assessment Regulation 2000, cl 25E(1)(b))

The merits of the Draft Planning Agreement are reflected within the discussion of the objectives, nature and effect of the agreement above.

The Draft Planning Agreement will have a positive impact on the local community by providing necessary infrastructure before residential development on the land begins. This infrastructure will assist with protection of the environment from stormwater flows.

The Draft agreement will also provide an economic benefit, in that the construction of this capital infrastructure will occur at no cost to ratepayers and there will be a contribution towards any ongoing maintenance costs.

There is no negative impact on the public from this Draft Planning Agreement.
