SECTION SCALE 1:10

MAINTENANCE SCHEDULE - STREET TREES

Street trees shall be maintained for 36 months following installation to the following minimum standard:

WATER

Water plants deeply - as a guideline: (25 litres of water per m2/week) three times a week for 2 weeks, then twice a week for 2 months, then 1-2 times per week for remainder of year. Monitor soil conditions to ensure root ball is kept moderately moist and adjust water quantity and frequency dependant on rainfall and season.

Top up mulch to 100mm depth, in a minimum 600mm diameter around tree. Do not place mulch in direct contact with plant stem. Every 4 months.

WEEDS

Remove weeds from mulch area (by pulling out at roots). Do not spray herbicide within mulch zone. Fortnightly.

HEALTH

STAKES

Inspect foliage and branches for disease or pest infestations. Fortnightly. Control where necessary.

Check stakes/ guards and replace/repair as necessary. Adjust as required to ensure no

damage to stem or branches. Ensure free movement of plant. Weekly.

FORMATIVE PRUNING. Check for defects in tree structure and prune where necessary in accordance with Natural Target Pruning Techniques. Undertake pruning in accordance with AS4373:2007 'Pruning of Amenity Trees". Any puning to be undertaken by qualified arborist or horticulturalist.

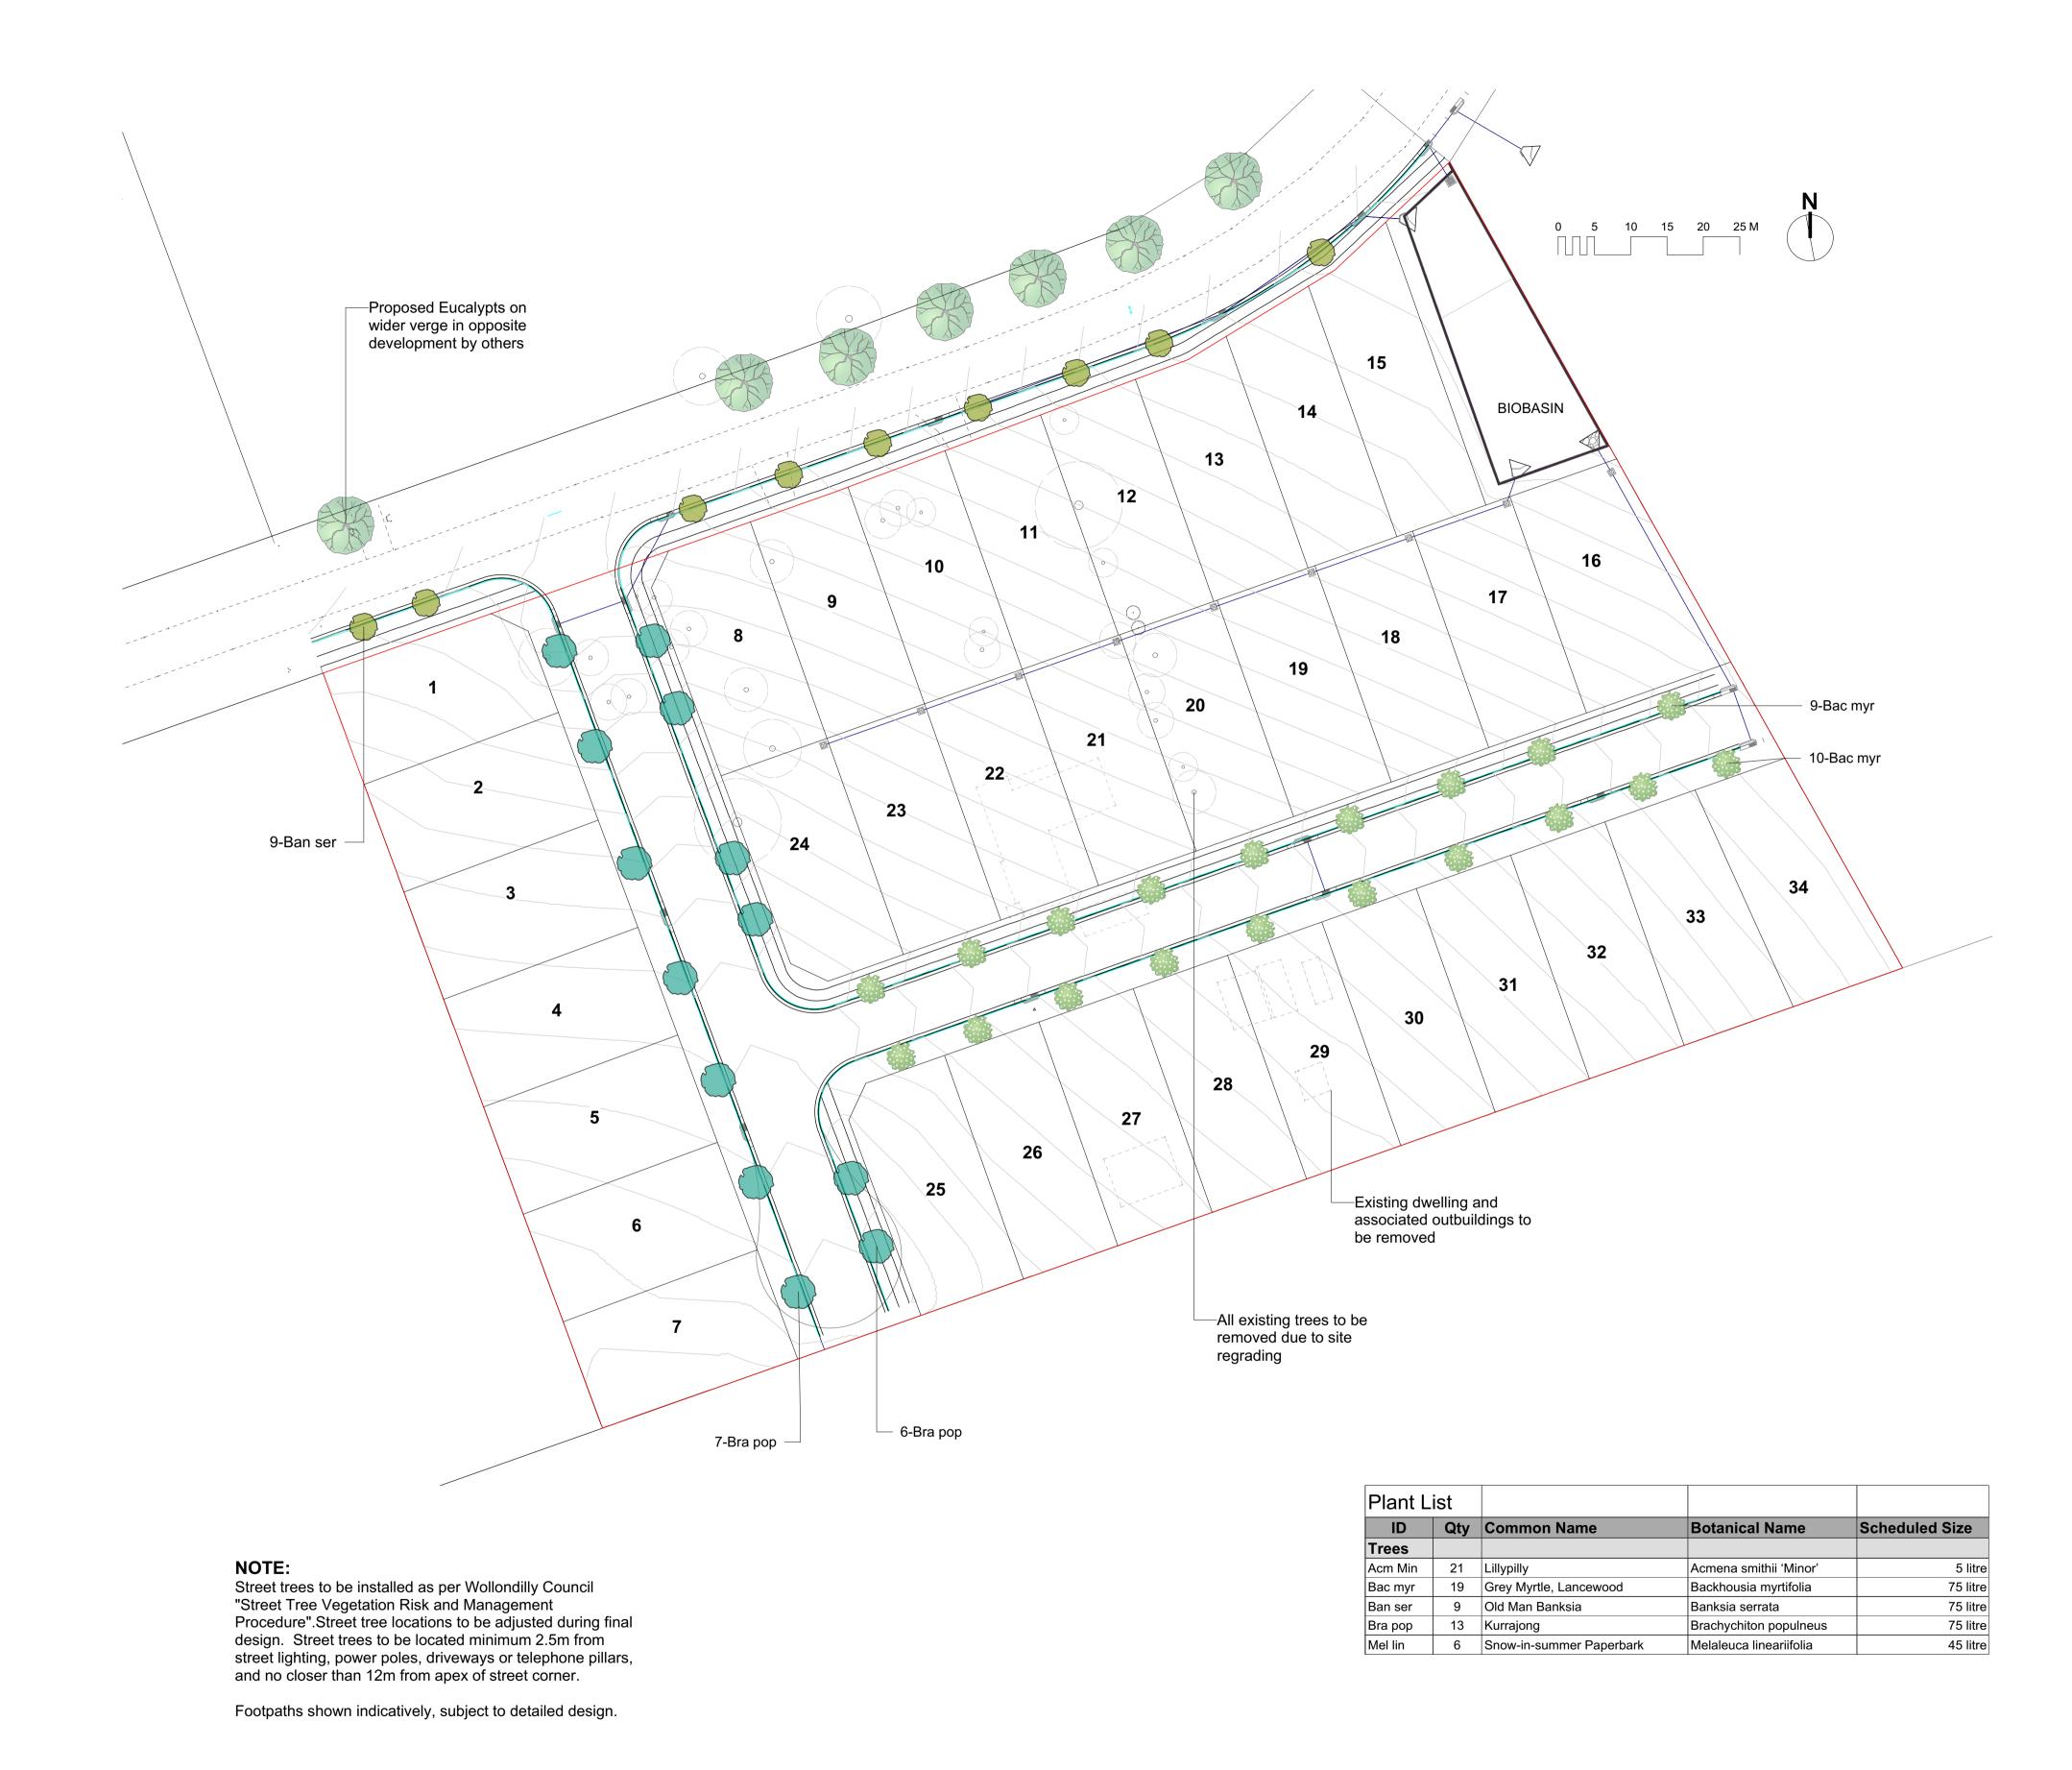

CROWN LIFTING.

At 6 monthly intervals, check that tree remains clear of pedestrian paths and vehicles. Remove lower branches as necessary to lift crown. Do not remove more than one third of total tree height. Prune as per "Formative Pruning".

Apply an appropriate balanced N:P:K slow release fertiliser - every 4-6 months depending on season.

REPLACEMENTS

Replace all plants that are missing, unhealthy or dead with plants of the same size, quality and species. Replace on a continuing basis not exceeding 2 weeks. Fortnightly.
