STATEMENT OF ENVIRONMENTAL EFFECTS - DRAFT

2289 Silverdale Road Silverdale 2752

TABLE OF CONTENTS

Introduction	2
Submission Checklist	3
Site Analysis	5
Development Proposal	7
General Description	7
Assessment Summary	8

INTRODUCTION

This Statement of Environmental Effects has been prepared in support of a Development Application for the proposed development, made under Part 4 of the Environmental Planning and Assessment Act 1979.

The proposed development is detailed in the application package submitted with subject Development application as well as in later sections of this document.

This Statement provides an assessment of the development proposal with respect to the relevant legislative context, social, economic and environmental impacts, and potential impacts of the works on the surrounding locality as well as any measures proposed within the application to mitigate such impacts.

This Statement details the proposed development's consistency with the applicable environmental planning instruments and development control plans including:

- Environmental Planning and Assessment Act 1979
- Environmental Planning and Assessment Regulation 2000
- Wollondilly Local Environmental Plan 2011
- Wollondilly Development Control Plan 2016

In this regard, it is envisaged that the proposed development is consistent with the aims and objectives of the relevant environmental planning instruments and development control plan whilst being compatible with the emerging character of the locality and minimising any potential impacts on the amenity of the adjoining properties.

SUBMISSION CHECKLIST

DEVELOPMENT APPLICATION	
CHECKLIST	
Completed Application Form and Checklist	- Provided
Payment of Fees (obtain quote from Council prior to lodgement)	- Provided
USB or Disc with all documentation saved with correct titles	- Provided
Plan requirements	
(a) Drawn to minimum A3 size at a scale of 1:100 (preferred) or 1:200, in ink	
(b) Highlight proposed works to distinguish from existing	- Provided
structures	
(c) Provide a separate set of plans for notification at A4 size of site plan and elevations (6 copies)	
Site Plan (to scale)	
(12 2222)	
Including but not limited to: (a) The location, boundary dimensions, site area and north point of the land (b) Existing vegetation and trees on the land (c) The location and uses of existing buildings on the land (d) Existing levels of the land in relation to buildings and roads (e) The location and uses of buildings on sites adjoining the land (f) The location of any proposed buildings or works (including extensions or additions to existing buildings or	- Provided
works) in relation to the land's boundaries and adjoining development (g) Proposed finished levels of the land in relation to existing and proposed buildings and roads (h) Proposed parking arrangements, entry and exit points for vehicles, and provision for movement of vehicles within the site (including dimensions where appropriate). Floor Plans (to scale)	
Including: (a) Dimensions (b) Layout (c) Partitioning (d) Room sizes (e) Intended uses of each part of the building	 N/A – no buildings proposed- portable storage structure only not warranting floor plan

Elevations & Section Drawings (to scale)	
Including: (a) Heights of any proposed buildings (other than temporary structures)	- N/A – no building proposed that are definable as such under the EP & A Act.
Statement of Environmental Effects (detailed outline of the proposal describing the environmental impact of proposal and compliance with relevant planning controls or any variations being sought to LEP or DCP)	- Provided
Shed/Outbuilding – Details of intended use of structure	 Use of ancillary structures detailed within this report
BASIX Certificate (required for all new residential development, swimming pools >40,000L or dwelling additions > \$50,000	- N/A
13. Landscape Plan (to scale) Including plant types and their height and maturity (not applicable to subdivisions creating < 5 lots, single dwellings, secondary dwelling and ancillary structures)	- N/A
16. Flora and Fauna assessment (if the development is likely to affect threatened species, populations or ecological communities)	- N/A
17. Detailed Survey Plan (to scale)	- Provided
32. Traffic Impact Study (where the proposal has the potential to generate traffic)	- N/A

SITE ANALYSIS

SITE ANALYSIS		
Site	2289 Silverdale Road Silverdale 2752	Lot/Section/Plan no: 15/-/DP38325
Site description	 The site is approximately 2.5ha and approximately 80m wide The site is currently clear of any development with sparse vegetation in the form of trees at varied maturity toward the rear half of the site. 	
Zone	 To provide a wide range of light industrial, To encourage employment opportunities at the area. To enable other land uses that provide factories and the area. To support and protect industrial land for a to support and protect industrial land for a to ensure development does not impact on Neighbourhood Centre. Permitted without consent Nil Permitted with consent Depots; Garden centres; Hardware and build Intensive plant agriculture; Kiosks; Landscapi Neighbourhood shops; Oyster aquaculture; Roads; Take away food and drink premises; Vehicle sales or hire premises; Warehouse or development not specified in item 2 or 4 Prohibited Agriculture; Air transport facilities; Animal be premises; Camping grounds; Caravan parks; Gacilities; Crematoria; Eco-tourist facilities; Extractive industries; Forestry; Function cent Highway service centres; Industries; Offensiv transport facilities; Pond-based aquaculture; facilities (outdoor); Registered clubs; Researd Respite day care centres; Retail premises; Ruworks; Stock and sale yards; Tourist and visit facilities; Water recreation structures; Wharf 	and to support the viability of centres. on other land uses. illities or services to meet the day to day industrial uses. on the viability of land within Zone B1 ling supplies; Industrial training facilities; ing material supplies; Light industries; Places of public worship; Plant nurseries; Tank-based aquaculture; Timber yards; or distribution centres; Any other coarding or training establishments; Business Cemeteries; Centre-based child care exhibition homes; Exhibition villages; cres; Hazardous storage establishments; ve storage establishments; Passenger Recreation facilities (major); Recreation ch stations; Residential accommodation; ural industries; Sawmill or log processing or accommodation; Waste disposal
Applicable EPI	Wollondilly Local Environmental Plan 2011	
Applicable DCP	Wollondilly Development Control Plan 2016	
Precinct	N/A	
Constraints	- The subject site is noted to be bushf	ire prone land

DEVELOPMENT PROPOSAL

General Description

The subject Development Application is seeking consent to use a partial extent of the site as a 'depot' as defined by the Wollondilly Local Environmental Plan 2011. The area for the proposed use is demonstrated as a dashed line area of the submitted plans and is approximately 60m wide by 100m deep. The remaining 20m along the southern boundary will be utilised for access to the main depot area and storage of the portable structure referenced on plan and below.

"depot means a building or place used for the storage (but not sale or hire) of plant, machinery or other goods (that support the operations of an existing undertaking) when not required for use, but does not include a farm building."

In support of the proposed use some minor site works are proposed. Specifically –

- The area for the proposed depot and the access handle is to be converted to semipermeable
 hardstand utilising crushed sandstone. The sandstone is envisaged to be an optimal choice in that it
 will prevent erosion or soil disturbance potential from the use of the site whilst enabling filtered
 permeation of stormwater to essentially continue on to natural flows.
- In support of the proposed use a portable container type structure is to be positioned on site as per the submitted plans. The use of this structure is ancillary to the depot. It is only intended to be utilised/access periodically for the storage of inventory lists and similar administrative functions. It is not envisaged to nor required to eb serviced by power, water or sewer.

Traffic movements to and from the site are envisaged to be minimal. The site is not to be occupied/staffed on a day to day basis as the stored items/materials will be dropped off and picked up as required. This follows onto the proposed hours of operation and staff. The applicant is seeking consent for the widest range available in terms of hours of operation and will adhere to recommendations by way of conditions of consent in this regard. Staffing numbers at any one time is envisaged to be under five persons in accordance with the temporary occupation required for the site to serve the intended function. To that end no permanent facilities such as toilets are proposed or deemed to be required.

ASSESSMENT SUMMARY -

STATUTORY FRAMEWORK		
Wollondilly Lo	cal Environmental Plan 2011	
Permissibility	Applicable zone: IN2 Light Industrial	The proposed land use has been reviewed against the permissibility provisions of the IN2 Light Industrial zone within the Wollondilly Local Environmental Plan 2011. In this regard, the proposed is permitted under Part 3 'Permitted with consent' – 'depot'.

<u>depot</u>

means a building or place used for the storage (but not sale or hire) of plant, machinery or other goods (that support the operations of an existing undertaking) when not required for use, but does not include a farm building.

Wollondilly Development Control Plan 2016

Volume 1 – General

PART 2 - General considerations for all development

2.1 Objectives

- 1. To ensure that developments are undertaken with due regard to human safety.
- 2. To ensure that developments do not unreasonably impact on their surrounds.
- 3. To ensure that developments achieve a satisfactory level of social equity.
- 1. The consent authority shall consider the following safety and human health risks in assessing a development application under this volume:
- a) Road and traffic hazards;
- b) Bushfire threat;
- c) Flood risk;
- d) Noise, vibration, pollution, odour, radiation or waste from surrounding land uses;
- e) Exposure to electricity transmission systems;f);
- g) Potential exposure to children of material (including signage) from any nearby restricted premises and/or sex services premises;
- h) Hazards from vehicles within car parking areas; and
- i) Hazard from potential contamination of the land.

- a) The proposed is not envisaged to be associated with any notable increase in traffic movements to or from the site. No adverse impacts to safety or degraded human safety dynamics envisaged.
- b) The subject site is mapped as bushfire prone land though the proposed is not inclusive of any works nor use that would infer an increased or unacceptable risk in this regard.
- The subject site is not known to be flood prone land in the context of the proposed.
- d) The proposed is not envisaged to impart any adverse Noise, vibration, pollution, odour, radiation outputs beyond what is expected of the zone. The proposed is not envisaged to be impacted upon by waste from adjoining land uses.
- e) The proposed is not envisaged to be burdened by exposure to electricity transmission systems.
- f) The subject site is not known to be burdened by exposure to radiation from telecommunications infrastructure
- g) The subject site is note known to be burdened by exposure to material (including signage) from any nearby restricted premises and/or sex services premises
- h) The proposed is not envisaged to be interpreted as a notable increase of traffic hazard exposure.
- i) The subject site is not known to be burdened by any contamination source.

2. The consent authority shall consider the suitability of the road network in the vicinity in	In the context of the existing overall development of the site as well as adjoining land
assessing a development application under this volume.	uses, the proposed is not deemed to be a notable increase or degradation to the suitability of the road network in the vicinity
3. The consent authority must not grant consent	The subject site is not known to be within a mine
to a development application for development	subsidence district/area.
within a proclaimed mine subsidence area	•
without the concurrence of the Mine Subsidence	
Board.	
4. The consent authority must not grant consent	The proposed is seeking consent for or reliant on
to a development application for development	any waste water systems
subject to this volume on land unless it has	
considered the impact of the development on	
any system for the management of wastewater	
present on that land	
5. The consent authority must not consent to	The subject site is not known to be within a
the carrying out of development within a	drinking water catchment nor is any adverse

7. Where a development is proposed on sites	The proposed is envisaged to have demonstrated
which do not contain areas mapped on the	suitable positioning in this regard
Natural Resources Water or Natural Resources	
Biodiversity maps and contain native	
vegetation, the development shall be located in	
accordance with the following (in order of preference):	
i) on cleared parts of the site wherever possible;	
or	
ii) in locations where the least amount of	
vegetation removal would be required (e.g.	
close to roads)	

if the development is not able to be located wholly in a cleared area; or

iii) If the development is not able to be located wholly in a cleared area, then the development should be located on parts of the site in which the vegetation is determined as being of the least significance and recovery potential. This includes consideration of vegetation removal for any main buildings, ancillary buildings, asset protection zones, effluent disposal areas and access driveways that may be required for the development.

8. In cases where native vegetation removal is required a flora and fauna report from an appropriately qualified ecologist may be required to satisfy compliance with any of the controls listed above

There are trees to be removed in support of the proposed as per the submitted plans. The subject trees are not known, or envisaged, to be of any ecological significance.

PART 10 - Tree removal

In this section a reference to removing a tree is a reference to the full range of activities described in Clause

5.9 (3) of Wollondilly Local Environmental Plan, 2011. That is, the ringbarking, cutting down, toping, loping, removing, injuring or wilfully destroying of any tree.

In this section Native Vegetation means:

Any of the following types of indigenous vegetation:

- (a) trees (including any sapling or shrub, or any shrub);
- (b) understorey plants;
- (c) groundcover (being any type of herbaceous vegetation);
- (d) plants occurring in a wetland.

Vegetation is indigenous if it is a species of vegetation, or if it comprises species of vegetation, that existed in the state before European settlement.

In this section a tree is considered to be a tree or shrub which meets one of the following:

- a) is greater than 3 metres in height; or
- b) The trunk has a circumference of 450mm at 1 metre above ground level; or
- c) has a branch span of greater than 3 metres

10.3 Trees/other native vegetation that may be removed without consent and without a permit (i.e. exempt)

1. Removal of a tree or other vegetation species that is a declared noxious weed by the NSW Government under the Noxious Weeds Act, 1993 or that is a species of tree identified below, regardless of size

(unless the tree is listed as a heritage item):

- 1. African Olive (Olea europaea)
- 2. Bamboo (Phyllostachys spp. bambusa spp, Aundanaria)
- 3. Black locust (Robinia pseudoacacia spp)
- 4. Box Elder (Acer negundo)
- 5. Camphor Laurel <20 metres in height only (Cinnamomum camphora)
- 6. Canary Island Date Palm (Phoenix canariensis)
- 7. Cassia (Senna pendula)

8. Chinese Celtis (Celtis sinensis)		
9. Cocos palm/queen palm (Syagrus romanzoffian	a)	
10. Leighton's green Pine (Cupressocyparis x leylandii)		
11. Cootamundra wattle (Acacia baileyana)		
12. Coral Tree (Erythrina x sykesii)		
13. Cotoneaster (Cotoneaster spp.)		
14. Date Palm (Phoenix dactylifera)		
15. Evergreen Alder (Alnus jorulensis)		
16. Evergreen Ash (Fraxinus griffithii)		
17. Golden wreath wattle (Acacia saligna)		
18. Honey Locust (Gleditsia triacanthos)		
19. Ice cream bean (Inga edulis)		
20. Privet (Ligustrum spp)		
21. Oleander (Nerium oleander)		
22. Peppercorn (Schinus spp)		
23. Radiata Pine <20 metres in height only (Pinus I	Radiata)	
24. Poplar <20 metres in height only (Populus spp.	•	
25. Queensland Silver Wattle (Acacia podalyriifolia		
26. Rhus (Toxiocodendron succedaneum)	~,	
27. Rubber Tree (Ficus elastica)		
28. Silky Oak (Grevillea robusta)		
29. Slash Pine (Pinus elliottii)		
30. Sweet Pittosporum (Pittosporum undulatum)		
31. Tree Lucern (Tagasaste Chamaecytisus palmen	cic)	
32. Tree of Heaven (Ailanthus altissima)	313)	
33. Umbrella Tree (Schefflera actinophylla)		
34. Wild Tobacco Tree (Solanum mauritianum)		
35. Willow (Salix spp.)		
36. Yellow Bells (Tecoma stans).		
	N/A	
2. Removal of a tree or other form of vegetation that is located within 3 metres of an existing	N/A	
lawfully constructed building or access		
driveway. (In this control, a tree is to be		
measured from the external part		
of the trunk to the building).		
3. Removal of a tree or other form of native	N/A	
vegetation that is located within 3 metres of a		
building or access driveway authorised by a		
development consent. (In this control a tree is to		
be measured from the external part of the trunk		
to the building). For the purposes of this		
exemption a complying development certificate		
is NOT a development consent.		
4. Removal of any tree or other form of native	N/A	
vegetation that Council is satisfied is dying or		
dead and is		

not required as the habitat of native fauna. The owner of the land (or persons acting on their behalf) on which the tree or vegetation exists must provide to Council written justification, including photographs, from an arborist or other suitably qualified person. Works must not be undertaken until Council has provided written advice that it is satisfied that the tree or vegetation is dying or dead		
5. Removal of a tree or other form of native vegetation that Council is satisfied is a significant imminent risk to human life or property. Works must not be undertaken until Council has provided written advice that it is satisfied that the tree or vegetation poses an immediate danger to people or property	N/A	
7. Trees or other form of vegetation to be pruned as part of routine pruning of fruit trees, or commercial horticulture or forestry operations	N/A	
8. Amenity Pruning within Australian Standards.	N/A	
10.4 Trees/other native vegetation that may be removed without development consent but require		
a permit		
1. The Council may issue a permit for the removal	of no more than 5 trees provided that:	
a) The tree does not form part of a heritage site or is within a heritage conservation area, including a Landscape Conservation Area, or that forms part of an aboriginal object or that is within an aboriginal place of heritage significance; and	Whilst the proposed is seeking consent for the removal of a number of 'trees', no more then five of these are of a size that would justify them to be considered under this section. These trees do not form part of any heritage values	
b) The retention of the tree is not required by a development consent condition or a section 88B restriction as to user that prohibits tree clearing or removal of the tree in question; and	The vegetation to removed is not known to be applicable in this regard	
c) The tree has not been identified as containing tree hollows or significant habitat or food source; and	The subject trees are not known to contain hollows or other fauna habitat/feed significance.	
d) The tree is not located within a Natural Resources Biodiversity Area or that is within the Natural Resources – Water layer under clauses 7.2 and 7.3 of Wollondilly Local Environmental Plan 2011; and	The subject trees are not known to be within any such areas.	

e) Must not form part of a vegetation	The subject trees are not known to be formative
community which has been identified as an	of any such communities.
endangered ecological community or	
threatened ecological community under any Act	
of legislation.	
f) Council has not issued a permit to remove	The subject property is not know to be benefited
trees or other native vegetation under this	by any such consents

Further details are provided in the assessment of Volume 7 — Industry and Infrastructure. Conditions of consent are envisaged suitable mechanisms to ensure appropriate species are used.

Volume 7 - Industry and Infrastructure

PART 1 - PRELIMINARY

1.2 Objective

- 1. To provide for development that protects the scenic qualities of the Wollondilly Shire Area.
- 2. To ensure that industrial development has a neutral or beneficial effect on the natural and built environments.
- 3. To provide employment opportunities that significantly contribute to economic activity within Wollondilly Shire.
- 4. To provide controls for industrial development that will encourage the use of land for sustainable and viable industrial activities.
- 5. To ensure the most efficient use of industrial land that is consistent with the existing amenity of the area.
- 6. To ensure the orderly provision of services and infrastructure.
- 7. To ensure good vehicular access, circulation and loading facilities on industrial sites to avoid impacts on pedestrian and vehicular mobility in the locality.
- 8. To ensure adequate on-site car parking is provided.
- 9. To ensure access to adequate services is provided for the disposal of waste.
- 10. To promote high standards of architecture, landscaping and building design that is visually attractive in form, design, colour and scale.
- 11. To ensure that industrial developments are suitably designed and landscaped without restricting their viability through over regulation.
- 12. To ensure industrial development is undertaken in a manner that minimises land use conflicts.
- 13. To ensure buildings do not adversely affect views from adjoining zones, classified roads (Picton Road and Remembrance Driveway) or other public spaces.
- 14. To ensure soil conservation and sediment control measures are implemented during and post-construction.
- 15. To permit development which serves the daily convenience needs of persons working within industrial areas.
- 16. To encourage the integration of land use and transport, and provide for environments that are highly accessible and conducive to walking, cycling and the use of public transport.

PART 2 – General Requirements for all development

1. Setbacks for buildings erected on industrial
zoned land shall be in accordance with the
following table:

The subject application is not seeking consent for any construction or erection of a building as defined by the EP & A Act. The proposed portable

		structure is compliant with the setback	
		prescribed below regardless.	
	Setback red	quirements	
Front setback	30 metres from an arterial road 10 metres all other roads		
Side and rear setback	Nil setback required except as provided by this table and subject to bushfire and water course separations		
Setbacks from boundaries adjacent to zones other than industry zones IN2 and IN3.	10 metres from adjoining residential, commercial or open space zones.		
2.2 Building design		The proposed is not inclusive of any 'buildings' defined by the act. Any structure on site is regardless envisaged to be compatible with section 2.2 of the DCP.	as
2.3 Parking and access			
1. Car parking, manoeuvring areas, dr access, signposting and loading bays r designed in accordance with Council's Specification.	nust be	The proposed is envisaged to comply in this regard	
2. Vehicles are to enter and leave the subject		The proposed is envisaged to comply in this	
site in a forward direction. regard 3. Where through vehicle travel paths are not N/A		-	
able to be provided (for example, who setback is proposed) all lots must pro-			
sufficient level space on-site for rigid			
articulated vehicle turning areas. This space			
must be unobstructed and clear of dra	ainage		
lines, power poles and parking spaces			
4. The number of parking spaces requ	ired for	The proposed depot is evidently a low scale

For all development in existing or proposed	N/A the subject site is not located in an urban		
urban areas consent must not be granted for	area		
development unless the assessing officer is	area		
satisfied that:			
(a) the stormwater management system			
includes all reasonable management actions to			
minimise impacts on and contribute to the			
achievement or protection of relevant			
environmental values,			
(b) Water sensitive urban design principles* are			
incorporated into the design of the			
development, and			
(c) The stormwater management system			
complies with Council's requirements.			
For the purposes of clause 1 (b) above, the	N/A the subject site is not located in an urban		
principles of water sensitive urban design can be	area		
summarized as follows:			
(a) Protection and enhancement of natural			
water systems (creeks, rivers, wetlands,			
estuaries, lagoons, groundwater systems etc.),			
(b) Protection and enhancement of water			
quality, by improving the quality of stormwater			
runoff from urban catchments,			
(c) Minimisation of harmful impacts of urban			
development upon water balance and surface			
and groundwater flow regimes,			
(d) Integration of stormwater management			
systems into the landscape in a manner that			
provides multiple benefits, including water			
quality protection, stormwater retention and			
detention, public open space and recreational			
and visual amenity, and			
ana visuai amemity, and			

(e) Reduction in potable water demand by using stormwater as a resource.

2.10 Ecological sustainability and Energy conservation

1. Any development application for industrial development on land affected by this DCP must be supported by documentation which identifies how the proposed land use will meet the objectives of cleaner production, conservation and minimisation of resources and waste production.

The proposed land use is definably negligible in relation the ecological sustainability and energy conservation.

The intended site functions are such that virtually no energy resource is required to facilitate the intended use.

The siting of the proposed use is such that minimal impact is envisaged to the natural state of the land nor to the associated ecological values. Of note is the industrial zoning of the land which immediately infers lower assignment of ecological value.

- 2. A Sustainability Assessment is required to demonstrate where viable ecologically sustainable measures are proposed, which may incorporate some or all of the following in the building design:
- Potential for effluent re-use
- Water minimisation techniques, including water recycling
- Waste minimisation techniques, including recycling
- ☑ Incorporate water efficient design principles. Rainwater must be collected and stored for re-use as on-site irrigation
- ② Use porous paving materials to minimise runoff
- Use drainage swales to slow down stormwater runoff and increase on-site infiltration
- Salinity hazard investigations
- ② Comfort levels and reduction on artificial lighting and ventilation. Orientate buildings to the North with overhang measures to protect from summer sun
- A selection of an energy efficient heating/cooling system
- ② Heating/cooling systems must target only those spaces which require heating or cooling and ensure efficient distribution/redistribution of warm/cool air.
- Where a space heating or cooling system is installed, it must be selected for maximum

N/A as per the above.

energy efficiency	
Light switches at room exits, dimmer switches,	
motion detectors for lighting doorways,	
entrances or outdoor security lighting,	
automatic turn-off switches used for outdoor	
purposes	
If evergreens are planted within the northern	
quadrant of the building, they must be	
spaced well away from the building so as not to	
obstruct the winter sun of any building
